

## RENEWABLE ENERGY SOLUTIONS

### **Solar and Battery**

We can provide you with a range of feasibilities, engineering, project management and construction and maintenance services for the renewable energy sector across multiple disciplines. Included in this service is a full assessment of your operation and the supply and installation of solar panel systems in keeping with Australian standards. We have the capability to install systems ranging from 3kW to 300kW.

### **Our services include the design and construction of:**

- Roof-top solar PV systems
- Ground mount solar farms
- Floating solar PV systems
- Energy storage systems (battery and flywheel)
- Power factor correction
- High voltage works (if applicable)

### **We also can facilitate and manage the following:**

- Network connections
- Asset maintenance and cleaning
- Asset data collection, monitoring and reporting
- Energy auditing

### **Products**

Benang PowerPod – Mix of Power Generation 'OFF GRID' Solution

### **Testing and Commissioning**

A strong, robust commissioning partner is essential to conclude the test and inspection paperwork at handover stage of the site into its operational stage. We ensure the installation is functioning as per the design specification via a comprehensive testing and inspection process.
